Profile Summary

Computer Science & Engineering graduate (AI & ML) with hands-on expertise in Python, Java, React.js, Node.js, and Scikit-learn, complemented by internships spanning Salesforce CRM development, Android application engineering, and web security. Experienced in building end-to-end web applications, training ML classification models, and implementing secure, scalable systems. Holds certifications in Generative AI, AWS Cloud, and MongoDB, with a solid grounding in data structures and agile software engineering principles.

Technical Skill

- **Languages:** Python, Java, SQL, C++
- **Frontend / Backend:** React.js, Node.js, Express.js
- **AI / ML:** Machine Learning, Neural Networks (NN), Deep Learning, LLMs, Scikit-learn
- **Databases:** MongoDB, SQL
- **Cloud / DevOps:** AWS (Cloud Practitioner), Salesforce Platform
- **Developer Tools:** Android Studio, VS Code, GitHub, Anaconda

Internship

Software Developer Intern – Ethical Hacking

Sep 2025 – Nov 2025

- Conducted vulnerability assessments and penetration testing on web applications, identifying and documenting critical security loopholes.
- Developed and executed scripts to simulate real-world attack scenarios, strengthening application-level security awareness.
- Collaborated with team to propose and implement security hardening recommendations across web application layers.

Android Developer Intern – Google Android Developer Program

Apr 2024 – Jun 2024

- Built and tested Android applications in Java using Android Studio, following Material Design guidelines for optimized UX.
- Implemented UI components, activity lifecycle management, and API integrations in mobile applications.
- Gained hands-on exposure to Google's development ecosystem and best practices for mobile app deployment.

Salesforce Developer Virtual Intern – Salesforce

Aug 2023 – Oct 2023

- Developed Lightning Web Components (LWC) and automated workflows using Salesforce Process Builder and Flow.
- Configured and customized Salesforce CRM using declarative tools and Apex programming; performed Apex testing.
- Implemented security controls and access governance to ensure data integrity across the platform.

Key Projects

React.js Authentication & UI Component App – React.js, JavaScript

2024

- Developed secure authentication with protected routing, registration/login workflows, and reusable React Hooks components.
- Built responsive Quotes and Accordion interfaces, strengthening component reuse, state management, and interactive UX.

Nexora Bio – Next.js, React.js, Tailwind CSS, Framer Motion

2026 | GitHub

- Developed a responsive biotech website with research pages, reusable components, modern UI, and smooth motion effects.
- Strengthened skills in frontend architecture, responsive UI/UX, animation design, and Git/GitHub project workflow.

Health Metrics Dashboard – HTML, CSS, JavaScript, Chart.js

2026 | GitHub

- Built a clinician-focused dashboard to visualize patient trends using interactive charts, filters, and responsive UI.
- Implemented CSV import/export and dynamic data interactions, gaining practical experience in visualization and dashboard development.

Education

B.Tech – Computer Science & Engineering (AI & ML)

2022 – 2026

Kallam Haranadhareddy Institute of Technology, Guntur, Andhra Pradesh

CGPA: 7.03 / 10.0

Certifications

- Generative AI – IBM SkillsBuild
- AWS Cloud Quest: Cloud Practitioner – Amazon Web Services
- MongoDB Certified Associate Developer – MongoDB University
- Google Android Developer – Google
- Zscaler
- Programming Essentials in C++ – Cisco
